

Hi !

I'm looking for the next project to be excited about. Hope to catch your attention, if only for a brief second:

I'm the **passionate developer** you're looking for: with experience accumulated since 2001 in domains like logistics, Stock Exchange market, finance and administration, GPS tracking and fleet management, custom borders scanning.

Immediately available.

Please consider my resume <https://rawgit.com/MecuSorin/WebStatic/master/CV/mecusorin.html> .

Looking for a remote job (to cut off the traffic time) - I have the required discipline (over 4.5 continuous years of remote work in the past).

I live in Bucharest, Romania (Europe) with my family (wife and 8 years old son) - can travel, but I'm not ready to relocate.

I'm willing to put employer in control of my time through tools like Wakatime:

<https://wakatime.com/features>

Before dismiss this application, please take the time to read about telecommuting - it may open an opportunity for you:

- [The Pros & Cons of Being a Remote Team \(The Employer's Perspective\)](#)
- [Benefits of remote work](#)
- [The 10 Biggest Misconceptions About Remote Work](#)

Good or bad, I'd love to hear from you.

Best regards,
Sorin
