Age: 40 Citizenship: Romanian Married, 1 child Cat AB driving license

Current Status

Immediately available - Searching for the next project to be excited about.

Skills

Extensive experience in finding practical working solutions to business problems.

Described as *reliable, friendly, creative, enthusiast* and *efficient*.

Having a good grasp of Design Patterns, DDD, BDD and TDD.

Characterized by the habit to learn something new with every chance.

Programming Languages

Programming languages polyglot . List of programming languages I would like to use in future projects:

F#	=====	(5 years as hobby and 18 months in production)
Elm / Elmlang	=====	(less than a year) as hobby
Haskell	=====	(less than a year) as hobby
Python	=====	(3 years) as hobby
Go / Golang	=====	(3 years) as hobby
C#	=====	(13 years in production)
TypeScript	=====	(5 years)
JavaScript	=====	(8 years)

Education

Google Cloud Training

Google Cloud Platform - [Learning Profile](#)

Microsoft Learn

Microsoft Azure Cloud - [Learning Profile](#)

Deeplearning.ai by Coursera platform

Deep Learning Specialization - [Certificate License DKMDM27AJZ9Z](#)

2018

Composed by following courses:

1. [Neural Networks and Deep Learning](#)
2. [Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization](#)
3. [Structuring Machine Learning Projects](#)
4. [Convolutional Neural Networks](#)
5. [Sequence Models](#)

Stanford University by Coursera platform

Machine Learning course - [Certificate License NNJVA7SM77QV](#)

2016

[University of Bucharest - Faculty of Mathematics and Computer Science](#)

Master's Degree, Computer Science - Artificial Intelligence

1997 – 2001

Recommendations

I managed Sorin for 18 months while at RealtyShares, and his attention to detail and work ethic were exceptional. He is deeply passionate about F# and Machine Learning / AI concepts and in practice. One event he even stayed up and online past 4am his time to participate in an F# ML hacking session with the team and F# community. Of the many arduous tasks Sorin conquered while on the team, most impressive was the migration of hundreds of thousands of financial documents from one platform to another in under a month of working on it. Fighting through inconsistent data and unreliable identifiers between documents and users, he was able to re-home every single statement. It

Had the pleasure of working with Sorin for roughly a year. Although he joined as a remote contractor, he quickly became an indispensable member of our team. Very conscientious developer who's scrupulous about testing, domain modeling, and correctness. He wrote many of the core F# libraries at RealtyShares and contributed to several high-profile projects as a team lead. Despite this, he's refreshingly modest and welcoming of constructive criticism. Sorin does exemplary work and is a true practitioner of the craft. No question he elevates any organization's development team, and he integrates exceptionally well as a remote team member.

was a pleasure working with Sorin; I look forward to the next opportunity.

Experience

Beside professional experience, as hobby, implemented various utility projects, gadgets (started with ATMEL micro-controllers, later Arduino) and mobile (F#, Fable, Giraffe, ASP.NET Core, Elm, Java, Cordova, Ionic, Golang, Canopy, Selenium, Docker).

I'm having a lot of fun doing various ML projects using TensorFlow and Keras.

Live-coding in F# on YouTube: [Watch Sorin live-coding in F# on YouTube](#)

IT Consultant at [RealtyShares Inc.](#)

1 year 6 months (December 2016 – May 2018) Referees: *Daniel Driscoll* and *Tracy Gonzalez*
(Worked remotely the entire period)

Activity short summary:

- » Created a critical back-end layer (40k F# loc) for the platform
- » Migrated the functionality from an Orchard CMS to a new solution that we build in-house without any activity interruptions
- » As a side project: I held training sessions for teaching F# to my colleagues

Technologies and framework used: F#, Suave, Expecto, Hopac, Paket, Fake, Canopy, C#, LinqToSQL, ASP.Net MVC, ASP.NET Core, Mono, Amazon Web Services (AWS), JavaScript, React, Redux, MSSQL, PostgreSQL, Redis and others ...

Senior IT Consultant at [MB Telecom LTD SRL](#)

1 year 1 month (April 2015 – April 2016) Referee: *Andrei Iacobita*

Activity short summary:

- » Added new functionalities and enhancements to the code base of an application that is used by the Customs Borders Police
- » Optimized the database queries and removed redundant calls, greatly reducing the response time
- » Augmented the testing platform to ease the code maintenance, fixed the bugs, improved the code coverage
- » Elaborated a tool that cope with data fragmentation, by auto-activation on the dynamic events configured
- » As a side project: programmed a small Arduino device and the associated mobile application.

Technologies and framework used: C#, TSQL, TypeScript, C++, MSSQL, LinqToSQL, ASP.Net MVC, EF, WCF, ASP.Net WebForms, Rx.Net, Azure, RxJS, AngularJs, Ionic, etc..

Solution Developer at [SAS Grup](#)

5 years 3 months (September 2009 – November 2014) Referee: *Adrian Dinu*
(Worked remotely over 4.5 continuous years)

Activity short summary:

- » Created a complex platform (from the services to the UI, everything except database queries and GPS devices specific logic) that provides fleet management solution as a service (biggest in Romania, that is used by companies like Coca-Cola, Orange, Vel Pitar). Analyzed, provided and presented, in various forms, the data collected by the GPS devices mounted on the cars.
- » One of the side-projects was to reverse engineered the API of a personal tracking device, by sniffing the serial communication, to create a configuration application (to remove human errors and to reduce the time needed from 8 minutes to less than 1 minute per device).

Technologies and frameworks used: C#, TypeScript, JavaScript, TSQL, WCF, WPF, WWF, Silverlight, WinForms, ASP.Net WebForms, ASP.Net MVC, Telerik, Unity IOC, OpenLayers, KnockoutJS, AngularJS, OpenstreetMaps, Leaflet, D3.js, SignalR, Rx.Net, T4, SQLite, etc..

Solution Architect and Developer at [Rosal Grup SRL](#)

2 years 5 months (April 2007 – August 2009) Referee: *Cosmin Oprea*

Activity short summary:

- » In a team with other 2 programmers, developed an ERP solution for a group of over 40 firms with different area of activity (street cleaning, trash recycling, electronics manufacturing, tiles manufacturing, i.a.).
- » One of the side-projects was an inventory scanning application on Windows Mobile that could operate both on-line and off-line.

Technologies and framework used: C#, JavaScript, TSQL, WinForms, ASP.Net WebForms, MSSQL, MS Reporting Services, Crystal Reports, WS-Security, Windows Mobile, etc..

IT Manager at SSIF Euro Invest Vision SRL

2 years 8 months (September 2004 – April 2007) Referee: *Corona Radulescu*

Activity short summary:

- » Maintained the solution used by the brokers for trading on the Stock Exchange.
- » Fixed some very subtle bugs inherited in the code base
- » Improved the application data flow between the brokerage house and the Stock Exchange Authorities
- » Added new features and updated the business logic to keep up with the frequent changes of the Stock Exchange regulations.

- As a side-project started the transition of the platform (except the accounting application) from Access to Microsoft SQL server.

Technologies used: TSQL, Visual Basic, C#, Access, MSSQL

Solution Developer and IT Administrator at [SC Magic Tic-Tac SRL](#)

3 years 2 months (April 2001 – May 2004) Referee: *Dan Plosca*

Activity short summary:

- » Developed an ERP solution for a firm that provides food distribution and logistic services.
- As a high note created a driver for a POS in FoxPro, to improve the speed of sales.

Technologies used: FoxPro and Visual FoxPro

Hobbies

Aikido and Chess - to keep a healthy body: "Mens sana in corpore sano"
